New product lineup and lower price of Printable Open-source Humanoid, PLEN2
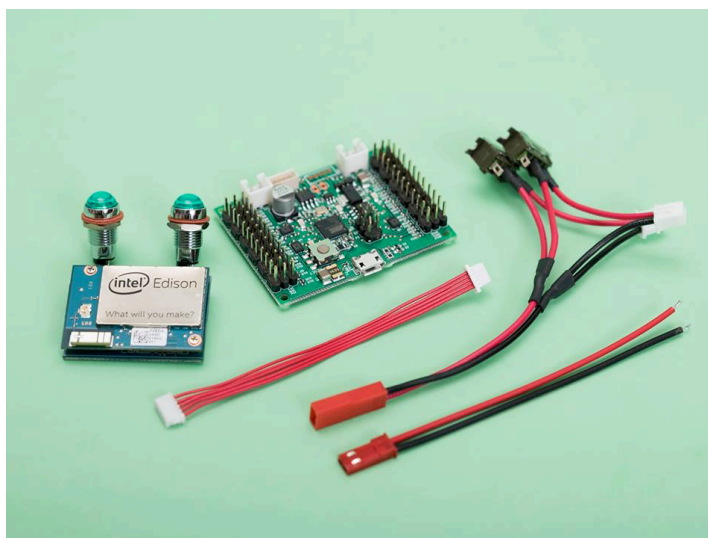

21 November 2016
PLEN Project Company

As part of our continued commitment to deliver PLEN2 to customers at the best possible price, effective as of 25 November 2016, PLEN Project Inc. ("the Company") is able to announce a series of upgrades to its product portfolio, lowering prices of PLEN2, and a discount for students and educational service providers.

New product lineup

In response to a lot of inquiries from customers, the Company adds the following products to its lineup:

- PLEN2 Developer Edition DIY Kit (ROS supported)
- Servo motor set for PLEN2 (18pcs)
- Servo motors for PLEN2 (1pcs)
- 3D data of PLEN 2 roller skate, version 3 (available on GitHub)

PLEN Project Company

Product upgrades

  The Company has modified the 3D data and mold design of several lower body parts, as well as parts of the motion software.

  In addition to these upgrades, two of the most difficult parts to 3D-print, servo horns and servo brackets, are now bundled with the DIY Kit.

New prices

  Through increased production and continuous cost reduction efforts with PLENGoer Robotics Inc., the joint venture corporation with a Chinese consumer electronics manufacturer, the Company is able to announce an average price DECREASE of 15% on its printable open-source humanoid PLEN2. The new prices are listed below.
